

Step into your new

**KOMATSU**

with a Power Step<sup>®</sup>  
Safety Access System

## HOW ELSE WOULD YOU GAIN ACCESS?

Power Step adds value to and enhances the safety of your equipment with a variety of safety access systems designed exclusively for Komatsu's range.

## SAFETY ACCESS SYSTEMS

Power Step offer a substantial range of Safety Access Systems designed and tested to operate in the harshest conditions.

Available in a range of different shapes and sizes, our team have the experience and expertise to ensure your new access system fits your needs, while maintaining compliance with all relevant safety standards.

We are continually improving and evolving our design and fabrication parameters, to ensure our products are the latest and most efficient systems on the market.

Power Step can handle both individual and large fleet orders, with all orders prioritized and managed with the same professionalism, quality and product support. Every Power Step System is important to us, giving you complete confidence your order will be delivered on time, and in perfect condition.

Take a step in the right direction and contact us about our huge range of access systems.

## Folding Stairs for Haul Trucks

The Power Step Folding Stair delivers a safe access route to the operators cab from ground level for staff working with Komatsu Haul Trucks.

### KEY FEATURES

The stair extends from the bumper bar to ground level and operates through a 24V power pack coupled to a hydraulic pump and operates the stair hydraulic cylinder.

In lieu of hydraulics, the Folding Stair can also be operated pneumatically; whereby the air supply will actuate from the truck's own air supply tank.

A control box will incorporate all air fittings, valves, filter and lubricator to ensure the smooth operation of the air cylinder.

Folded/Up

Unfolded/Down

## Folding Ladders for Dozers

An economical, non impinging access system for Komatsu Dozers, with an option for an all round vehicle access walkway.

### KEY FEATURES

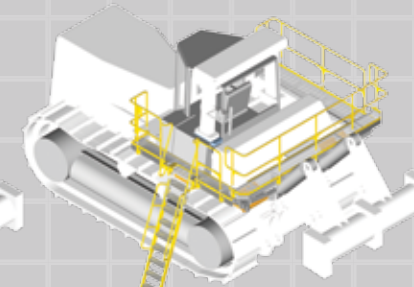

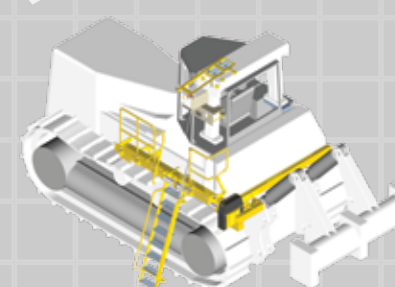

Provides users necessary 3-point contact when ascending or descending.

Supplied as a complete package with in-built power control for the hydraulic system, and a range of tread options.

### DESIGN OPTIONS

Ladder Only

Ladder with Walkways

Folded/Up

Unfolded/Down

## Ladders and Stairs for Graders

Power Step offers folding ladders and stairs to suit the Komatsu range of Graders.

### KEY FEATURES

The Power Step Grader Access System provides two Access Systems in one. Power Step introduced a new ladder design providing operators with safe access to and around the cab.

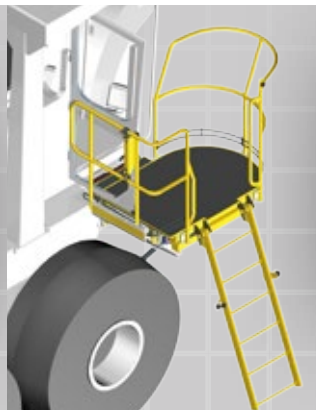

The left-hand side is a hydraulically activated ladder hinged to a large split-level platform. This allows operators and service personnel to carry out duties in and around the cab.

Komatsu 825 with Ladder and Platform.
